

OB10 Overview

What is OB10

OB10 is the leading global B2B e-Invoicing network. Customers of all sizes optimize their invoice processes with OB10 and benefit from improved efficiency and transparency. The OB10 network enables companies to send and receive error free, tax compliant invoices around the global without the need to install any additional hardware or software.

Suppliers provide invoice data directly from their accounting system, in their preferred data format. OB10 will translate the data into the Buyer's preferred format and enrich it with any Buyer specific data. The setup for enrichment of data takes place according to the Buyer's requirements. After validation an electronically signed invoice image will be created.

Benefits for Buyers

- Efficiency savings – eliminate costs by 60%
- Streamlines purchasing cycle – no manual data entry or archiving
- OBactive ensures high supplier participation
- Validation and rejection of non-compliant invoices through OBExchange reduces vendor query management
- Frees Accounts Payable resources to concentrate on more strategic tasks
- Benefit from improved supplier relationships
- Increases visibility and cash flow management
- Supports environmental concerns, by using less paper
- OBconnect supports any-to-any data formatting and works with any Accounting or ERP suite

Benefits for Suppliers

- Fast and secure invoice delivery
- Immediate visibility of invoice delivery
- Reduction in manual process costs
- Potential faster payment settlements
- Reduction in debtor days
- Improved cash flow
- Low entry barrier through OBconnect
- Supported by a multi-national team – working together in their own language

OB10 services provide the complete solution

OBactive – Personal supplier recruitment

As the success of e-Invoicing depends on the supplier participation, OB10 provides a fully managed supplier enrolment programme, using best practice to meet agreed targets.

OBconnect – Technology at its friendliest

OB10 provides an easy-to-use solution. Instead of mandating data standards, you can send and receive data in any format you choose, with no software or hardware to install.

OBportal – Your gateway to OB10

Enter to manage your account, access information and get tools, help and advice.

OBexchange – The nerve centre of OB10 e-Invoicing

This is where transactions are processed, translated, enriched, validated and digitally signed.

OBcompliance – The legal e-Invoice

Ensuring invoices are legally compliant. Maintaining invoice and archive regulations.

OBarchive – Secure data storage

A secure place where all your data is stored. You can access your transactions and reports 24/7.

OBachieve – Best Practice Programme Management

Making sure your project is a success.
